**To:** Whom it May Concern:  
**Re:** Letter or Recommendation  
EMC Company

Loughridge & Company recently completed the Healthsouth Rehabilitation Hospital in Fredericksburg, VA, a forty (40) bed, 42,000 sf facility and had the pleasure of working with EMC Company. EMC handled all Plumbing and Mechanical work as well as the Medical Gas Piping and all PHVAC associated with a full Kitchen installation. Additionally, above-ceiling (electronic) Coordination Drawings were a requirement for the PHVAC Subcontractor which involved integration of all building structural, plumbing, mechanical, electrical, fire sprinkler system, life safety systems, Nurse Call, etc. due to very limited space above-ceiling. Their efforts with all their undertakings and responsibilities helped to insure a successful project for all participants.

Throughout the project, we found their office and field personnel to be extremely knowledgeable and competent and, unlike some firms, maintained a constant presence on this project which lends itself to a high degree of continuity, not only regarding the PHVAC work but the overall project as well. They were always responsive, always professional and were an asset to the project and Project Team.

EMC managed their resources very well and helped to not only maintain the Project Schedule but were instrumental in driving their activities to keep other Team Members on track.

EMC has also been a valuable resource for (thankfully) sporadic service calls and have always remained responsive to warranty calls, which have been few.

Thus, we can highly recommend EMC Company for Plumbing and Mechanical work on any projects and remain available to discuss this firm with anyone seeking additional information about their capabilities. I can be reached at (804) 353-7373, extension 307.

Sincerely,  
**Loughridge & Company, LLC**
