Mr. Brian Moore
EMC Mechanical Services
1802 Ellen Road
Richmond, VA 23230

Dear Brian,

I wanted to take this opportunity to thank you for all of your and EMC's efforts over the last three years. Looking back, there has not been a time that RVA did not have a project with EMC. As a young company, it is particularly important that we surround ourselves with quality subcontractors. RVA's choice of clients demands that these subcontractors also perform at a high level. EMC has always performed professionally, on time and safely. It is clear that your long term commitment to a quality job and a satisfied client and end user are your number one priority. Perhaps that is why we chose to work with you on our own office project.

I have also come to appreciate EMC as a business partner. Your ability to assist with budgets, value engineering and even to take the lead on mechanical design-build projects have allowed several projects to move forward that otherwise would have stalled. EMC has responded to RVA's commitment to LEED certified projects by having your own personnel become LEED certified. You genuinely strive for a business relationship. You ask for our feedback and then actually implement ideas that help our two companies work better together.

I will stop short of nominating you for Sainthood, but please know that should you need a reference, RVA would be happy to accommodate. They may call me direct.

Sincerely,

RVA Construction, Inc.

Matson L. Roberts, PE
